About Robert C. Beck, D.Sc.

by Michael Forrest

Robert C. Beck's qualifications as a researcher is that he's a physicist and formerly a consultant to the Sandia Corp, Senior Staff Scientist at Eyring Research Institute, and consultant to the US Navy. Besides his impressive qualifications this is a man you have to admire just for his courage. Although we live in a country whose government does all it can to make us submissive unquestioning sheep, amongst us are a few who think for themselves and stand head and shoulders above the rest because of the strength of their spirit which must speak the truth they have discovered.

They are like John the Baptist shouting in the wilderness, living to tell it like it is though ridiculed and oppressed by the governing powers. Such a man is Robert C. Beck. Although he can live in relative ease the rest of his life because of the money he's made by holding the patent for camera flashers, he chooses to live on the edge and proclaim what he knows about this miraculous breakthrough in bio-technology that threatens to undermine one of the major financial pillars of this country--the drug based medical system.

Because of Robert Beck's lecturing and magazine articles, he is under constant threat of wrongful imprisonment as a result of the FDA trying to shut him up. Besides having armed government men raid his residence once already, he also has to constantly guard what he tells others over the phone because of constant attempts by the FDA to entrap him by catching him giving medical advice, which only doctors are legally allowed to do.

Despite all this he continues to lecture so that all will know that electromedicine is the inexpensive health key that millions are waiting for.

Robert Beck has personally seen hundreds of people helped with of all kinds of diseases including AIDS, prostate cancer, rheumatoid arthritis, Hepatitis A and B, Herpes B, Chronic Fatigue Immune Dysfunction Syndrome, cervical cancer, and lupus. All of these are caused by viruses and bacteria which is the forte of the Black Box and Magnetic Pulser, which means that the list of diseases these devices may reverse could be very long. Robert Beck himself lost 145 pounds and regrew some of his hair as a result of using these devices. How many millions of people fall into those two categories? Robert Beck has seen dozens of his friends use these devices and regain so much immune strength that they didn't lose a single day's work in over three years from getting sick! Wouldn't that be great? We all know the feeling of wanting to die when we get the flu. Do we really have to go through that every year? I think not. Robert Beck also knows of an MD who claims over two hundred documented cancer remissions by using only blood electrification via the Black Box. Robert Beck has personally helped more AIDS patients than any other type and feels that his devices are 100% effective if the patient uses them exactly as directed.

Bob Beck also thinks that they would be effective against Ebola, but hasn't known anyone yet to use it against that super-killer. Besides disabling viruses and bacteria the Black Box also has life enhancing effects. Robert Beck has told of a blood analysis that revealed that blood normally stays alive for 4 days in a microscope slide, but will last for one month if taken from someone who has undergone Black Box treatment! I have even heard of someone that uses his Black Box all day every day because of the energizing effect he gets with it. He says it gives him "immortal blood"! Bob Beck's two most recent magazine articles are available in *Explore More!* magazines, issues #15 and #18. The magazines address is: PO Box 1508, Mt. Vernon, WA 98273, ph 360-424-6025. Because of FDA harassment, Mr. Robert C. Beck desires not to be contacted by people with questions. He has already given us more than we need to get well.
